2009 Round Lake Property Owners Association Petition Concerning Round & Little Round Lakes in Sawyer County Wisconsin

We are NOT in support of abandoning The Placid Diversion Canal Dam and channel/canal between Tiger Cat Flowage and Round Lake in Sawyer County unless there are comparable adjustments in minimum flow going out of Round & Little Round Lake at Carlson Dam Channel. This means that if the long standing (50+ years) surface inflow under McClaine Road thru the Placid Diversion Canal dam and channel is stopped then equivalent outflow reductions need to be made at Carlson Dam channel/canal. We are also in favor of maintaining/restoring the natural long standing historical stream between Placid Lake and Round Lake.
